

Dreampark Gives UK Fibrecity Residents Access to Ultra Fast IPTV Services

Company advances on the UK market to provide middleware for the IPTV installation by Fibrecity Holdings Limited

NORRKÖPING, Sweden – May 04, 2010 – Dreampark, one of the leading IPTV middleware providers on the European market, today announced it will provide middleware for the set top boxes that Fibrecity Holdings Limited, an i3 Group company, is installing in UK residents' homes so that they can access next generation services including IPTV and ultra fast broadband.

Fibrecity Holdings Limited has developed a groundbreaking next generation service model that allows residents with a connection to a Fibrecity network to access next generation services including 100Mbps broadband from multiple service providers via a single Fibrecity connection. The firm has chosen Dreampark Dreamgallery™ Middleware because it maximises flexibility and performance to allow Fibrecity to easily add new features while maintaining fast IPTV services for residents using the Fibrecity portal.

“The Fibrecity network has been designed to offer choice and easy access to next generation services. Our partnership with Dreampark means that residents taking up services with our service provider partners will be able to navigate the Fibrecity portal easily and intuitively,” said Dafydd Thomas, CTO of i3 Group.

“This contract showcases Dreampark’s position as the leading IPTV middleware provider in Europe. We are proud that Fibrecity Holdings Limited has chosen Dreampark and we are confident this partnership will achieve its goal of delivering feature-rich IPTV to residents connected to the Fibrecity network,” said Per Skyttvall, CEO at Dreampark. “We are very pleased to have been awarded this contract and look forward to working closely with Fibrecity Holdings Limited to ensure its success in the IPTV space.”

About Dreampark

Dreampark delivers TV on Your Terms. Dreampark’s Dreamgallery™ is the most deployed IPTV middleware in Europe on any platform and any environment. For more information, please visit www.dreampark.com.

About Fibrecity Holdings

Fibrecity Holdings is an i3 Group company. Using i3 Group’s methods, **Fibrecity**® networks provide an open access network infrastructure for town and city-wide connectivity to residents and businesses. These fibre to the home (FTTH) or fibre to the premise (FTTP) connections give access to the

Fibrecity and FS Focus System Fibre Optical Cable Underground Sewer System (FS System) are registered trademarks of i3 Group Limited.
